COMTEC DATA CENTRE ASSESSMENT (CDCA)

Ensuring your data centre is available, efficient and protected.

comtec power
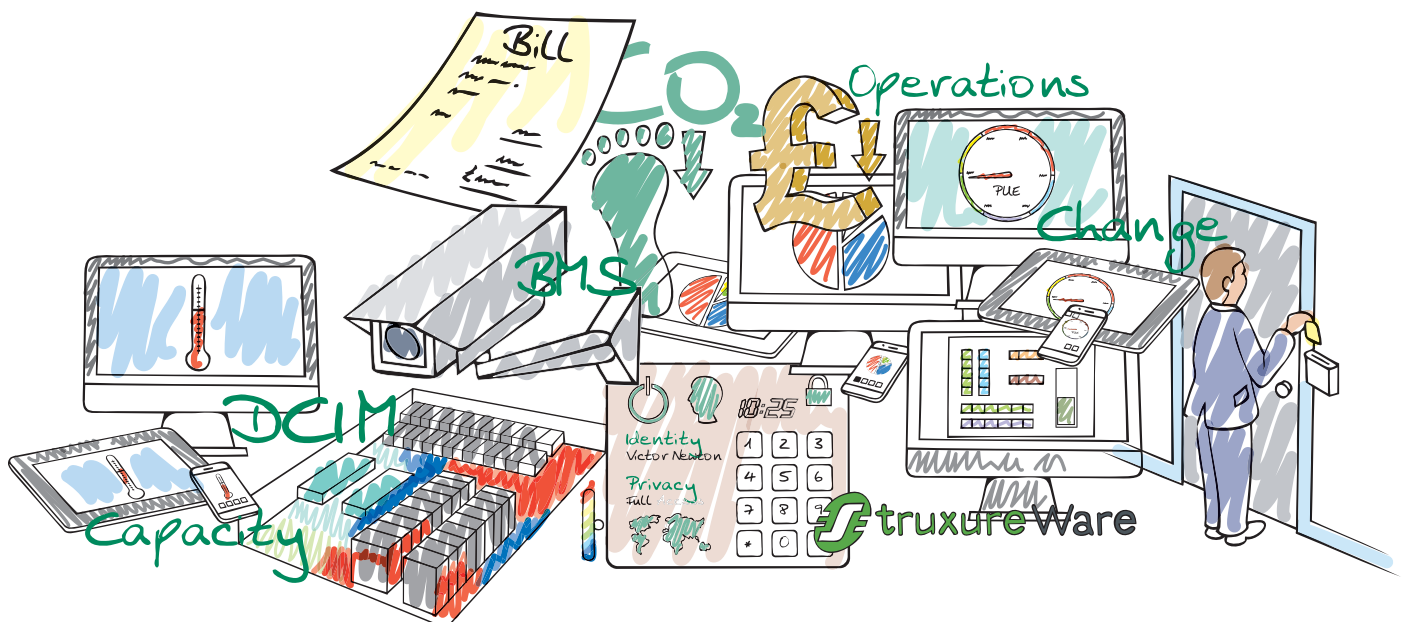

datacentre & server room solutions

INTRODUCTION

Your business **trusts you** to look after it's IT services and **protect** its data. Are you confident that **your data centre, server room or comms room** will perform **reliably** in all situations, meeting business SLAs?

As an Elite Partner to Schneider Electric our eye for detail and award-winning data centres have helped companies **reduce costs** and **expand capacity** at locations across the Country. We understand the negative impact that **failures** can have on your facility, your business and more importantly, your reputation.

The Comtec Data Centre Assessment (CDCA) was designed to ensure data centres remain as safe, secure, and resilient as they were intended.

If you are unsure as to whether or not to request a CDCA take a look at the questions below and contact a Comtec Data Centre Specialist on **0800 008 7599** today.

- Does the data centre meet your current and future business requirements?

- Is your business benefitting from the predictable performance you intended?

- Are you at risk of a power failure or problem through faulty or outdated equipment?

- Have you deployed a DCIM solution?

- And if not, could you save money by deploying newer, more efficient data centre technology

THE COMTEC DATA CENTRE ASSESSMENT

The Comtec Data Centre Assessment will provide you with an on premise evaluation of your comms room, data centre or switch room. Our trained engineers will examine your UPS and power infrastructure, cooling systems and their suitability, environmental monitoring, airflow and rack layouts inside the facility.

Once completed we will provide you with a report on the findings from our visit, indicating any recommendations to improve resilience, maximise efficiency and reduce cost. These can include relevant data centre infrastructure management software (DCIM) tools, auditability and a general infrastructure overview versus IT infrastructure.

And should we find that your data centre is running as it should be, we'll provide you with the peace of mind that your facility is as robust and resilient as your business expects.

CDCA Q & A

How can I register for a Comtec Data Centre Assessment (CDCA)?
To register for your CDCA please visit:
http://www.comtecpower.com/free-data-centre-assessment/
Or call **0800 008 7599**

### What is the next step should you find anything wrong?
Any issues will be identified along with recommendations for replacements or repair. Likewise any suggestions for reducing energy consumption or cost saving initiatives will be provided.

What should I do if I have a fault at a later date?
In an emergency please contact Comtec Power directly on **0800 008 7599**

Terms and conditions
The Comtec Data Centre Assessment (CDCA) is subject to a pre qualification by a Comtec Data Centre Specialist prior to agreeing a visit date.

Comtec House, 46a Albert Road North, Reigate, Surrey, RH2 9EL
